## Dataset

- 16 columns at the frontend and backend with 37 columns
- 202 records of project development

SQLITE files

Database tables (DB\_TABLE)

Web Map Service (WMS)

## Major foreign investment projects in Cambodia

Published by: Open Development Cambodia

The foreign investment project dataset has been established to provide relevantly practical information within Cambodia's investment projects flow, comprehending major foreign investment projects, capital investment, and detailed information on the projects. The locations of the development and investment projects in Cambodia determined in the dataset come from the location of the development project, village, or provincial location. Within the data collection, data classification is categorized into the following three sections: 1. Government data: Information obtained from official government sources, with official legal documentation. 2. Secondary data: Information obtained from the (company/entity/EIA) or from government source(s) without legal documentation. 3. Other data: Information obtained from any other source in the public domain (including documentation from news, photographs, etc).
