

Harnessing data for accountability journalism

A glimpse into data journalism and its potential adoption in
Cambodia

About speakers

Eva Constantaras

Eva Constantaras is a data journalist specialized in building collaborative investigative teams. These teams have reported from across Asia, the Middle East, Latin America and Africa on accountability issues ranging from algorithmic bias and food insecurity to extractive industries and sanctions evasion. As a Google Data Journalism Scholar and a Fulbright Fellow, she developed a course for investigative data journalism in high-risk environments. She is also a winner of the Sigma Data Journalism and Philip Meyer Award and a finalist for the Daniel Pearl Award for Outstanding International Investigative Reporting and for the Gabriel Garcia Marquez Award for innovative reporting.

Mardy Sam An

Mr. Mardy is a skilled IT and Website Manager at Open Development Cambodia with the background in open data and ICT. He is responsible for the development and maintenance of the open data portal. Moreover, he has contributed to design and deliver multiple training programs for various group of audience in local and regional level.

Mr. Mardy is committed to promoting data-driven decision-making and digital innovation.

Pisith Vong

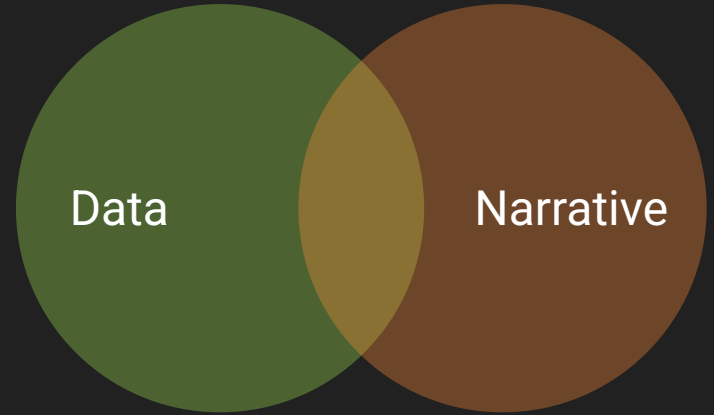

Within ODC, Pisith focuses on curriculum development for the capacity building program, specializing in data-related skills and Geographic Information Systems (GIS). He has extensive experience in conducting training on Data Literacy, Data Journalism, and GIS. Pisith's passion for data storytelling is further evidenced by his mentorship of journalists in data story production, drawing upon his expertise and experiences in data collection, analysis, visualization, and communication.

What is Data Journalism?

“At its core, the principles of data journalism and traditional journalism are the same. Both involve asking questions to paint a truthful and accurate picture of the world. In the case of traditional media, this information is usually obtained from an individual person’s account of a story (a single data point).

Data journalism takes this one step further by asking questions to a collection of data points (many people’s stories). This approach can help reveal the larger context of a story.”

Mohammed Haddad, Data Journalist, Al Jazeera

How an American Meat Broker Is Fueling Amazon Deforestation

Country:

BRAZIL CHINA

Author:

 Sasha Chavkin
RAINFOREST INVESTIGATIONS FELLOW

Global: How an American Meat Broker Is Fueling Amazon Deforestation

Data used in the story:

- China's beef import (UN Comtrade)
- Forest loss (Imazon)

Global: How an American Meat Broker Is Fueling Amazon Deforestation

Brazil has supplied China with 40% of its beef imports in recent years

China has become the world's largest importer of beef as household wealth has risen and the food has become a mainstay of the middle class. Brazil is now China's most prominent supplier of beef, accounting for over 40% of its beef imports in 2020 and 2022.

■ Imports from Brazil ■ Imports from other countries

Source: UN Comtrade / Graphic: Camille Fassett

Global: How an American Meat Broker Is Fueling Amazon Deforestation

Major findings

- Last year, the Brazilian Amazon lost more than 4,000 square miles (10,360 square kilometers) of rainforest, the equivalent of nearly 3,000 soccer fields each day.
- In the last decade, Chinese imports of beef from Brazil have increased from \$1.3 billion in 2013 to more than \$8 billion in 2022.

Global: How an American Meat Broker Is Fueling Amazon Deforestation

Major findings

- PMI has been a major player in feeding that growing market. As of 2017, the company was the second largest importer of Brazilian beef to China.

Regional: World's biggest deforestation project gets underway in Papua for sugarcane

Regional: World's biggest deforestation project gets underway in Papua for sugarcane

Major findings

- A total of 2 million hectares (5 million acres) of forests, wetlands and grasslands in Merauke district will be razed to make way for a cluster of giant sugarcane plantations
- Satellite imagery analysis shows that 30% of the concessions appear to fall inside a zone that the government previously declared should be protected under a moratorium program.
- At least 356 hectares (880 acres) of forest cleared in inside Global Papua Abadi (GPA) concession by alerts data from Nusantara Atlas.

National: Cambodia's land grab endangers people, forests, and the climate

Cambodia's land grab endangers people, forests, and the climate

By **Nehru Pry**

August 2022

Deforestation and land concessions

In the remote and densely forested northeastern province of Monduliri, Song Pro, a member of the indigenous Bunong community, stares at a rubber plantation that once was a sacred forest.

When the war in Indochina came to Cambodia, the forest saved Song Pro. At the sound of planes, she and her family hid deep within the its trails and trees, its canopy providing cover from the sights of American bombers. "We were safe in that sacred place," said the now 60-year-old farmer. But when peace finally returned, Song Pro and her community could not save the forest.

Cambodia's land grab endangers people, forests, and the climate

Data used:

- Tree cover loss 2000-2019 (Global forest watch)
- Cambodia land concessions (Licadho)
- Agriculture, forestry, and fishing, value added (% of GDP) (World Bank)
- Cambodia rubber export (UN Comtrade)
- Natural protected areas (ODC)

National Cambodia's land grab endangers people, forests, and the climate

National Cambodia's land grab endangers people, forests, and the climate

Cambodia's land grab endangers people, forests, and the climate

Major findings

- Cambodia lost one-third of its forest coverage over the last two decades.
- Cambodia's wildlife sanctuaries lost a half million hectares of tree cover over the same time period, the equivalent of losing a forest the size of Battambang City each year.
- Land concessions, which are almost Economic Land Concessions, granted more than 2 million hectares or one-eighth of Cambodia landmass to the private sector.

Cambodia's land grab endangers people, forests, and the climate

Major findings

- About half of the land concessions went to Cambodian companies and the remainder went to foreign investors.
- Most land concessions were granted for the development of rubber plantations, accounting for almost 800,000 hectares, followed by palm oil, cassava, sugarcane, corn and jatropha.
- The export value of rubber in Cambodia over the last two decades reached 2 billion USD.

Global: How is Jordan's education gap widening due to inequality?

Major findings:

- Three out of ten children from the poorest Jordanian families completed secondary school, compared to eight out of ten children from the richest families
- Education allocations from public spending in Jordan have declined over the past years from a percentage that exceeded 7% of GDP in the mid-1990s to less than 4% since 2013
- Private schools may be a definite option for parents to provide their children with a better education in Jordan.

Global: How is Jordan's education gap widening due to inequality?

Major findings:

- While 4 in 10 children pass the first level of TIMSS mathematics, only 3 in 10 children from the poorest families pass, compared with 6 in 10 from the richest families.
- In 2015, 8 out of 10 students passed the PISA reading test at level 1: 7 out of 10 of the poorest and 9 out of 10 of the richest

Cambodia: Low Teachers' Salaries Impacting Education Quality

Student-Teacher Ratio Comparison with Lower Secondary and Upper Secondary

Available data indicates a statistically significant disparity in student-teacher ratios (STRs) among primary, lower secondary, and upper secondary education levels during the period 2016- 2021. On average, primary schools exhibit an STR nearly twice that of upper secondary institutions, with figures standing at approximately 44.00% and 22.00%, respectively.

Search in table

Academic Years	Types of Schools	ST Ratio
2015-2016	Primary School	45
	lower-secondary	23
	upper-secondary	22
2016-2017	Primary School	45
	lower-secondary	20
	upper-secondary	20
2017-2018	Primary School	44
	lower-secondary	22
	upper-secondary	22
2018-2019	Primary School	45
	lower-secondary	22
	upper-secondary	22

Why police dismiss 1 in 5 sexual assault claims as baseless

UNFOUNDED

**WHY POLICE DISMISS
1 IN 5 SEXUAL
ASSAULT CLAIMS AS
BASELESS**

Global: Why police dismiss 1 in 5 sexual assault claims as baseless

Data used:

- National police data (unfounded sexual-assault cases)

Global: Why police dismiss 1 in 5 sexual assault claims as baseless

Major findings:

- According to The Globe's data, 42 per cent of sex-assault complaints lead to a charge.
- The Globe's data show vast discrepancies in unfounded rates between jurisdictions across Canada – **inexplicable swings from city to city, province to province**, regardless of size and demographics – which suggest that **complainants of sex assault in some parts of the country are far less likely to be believed than in other parts.**

Global: Why police dismiss 1 in 5 sexual assault claims as baseless

Major findings:

- Although discussion is often focused on the fact that fewer than one in 10 victims report their assault to police, and that fewer than half of the cases that do go to court end with a conviction – among the lowest conviction rates of any type of violent crime

Global: Why police dismiss 1 in 5 sexual assault claims as baseless

Major findings:

- Every year, an average of 5,500 people are reporting sexual violence to Canadian police, but their cases are dropping out of the system as unfounded long before a Crown prosecutor, judge or jury has a chance to weigh in.
